

ROYAL BAFOKENG LAND, ENVIRONMENT AND AGRICULTURE

Date: 20 October 2012

Mining

Objective :

- To acquire all prospecting rights and mining permits on our land
- where possible use it as equity.
- See to it that mining does not cause environmental disaster
- Maximize returns by negotiating contracts which are water tight especially with regard to surface usage of our land.
- Review all existing leases and update them in terms of new laws which are in place(NEMA)

Environment

Objective:

- To improve air and water quality by preventing possible degradation of same through mining and related activities on the land.
- Improve quality of growth and development without compromising the environment.
- Enforcement of Regulations
- To have good waste management and to avoid pollution of the environment.

Agriculture

- We have Agricultural Master Plan:
Objective :
- To establish food security
- To develop subsistence farmers to reach commercial level
- Finally we should have sustainable agricultural system.
How?
- We should establish enabling environment by developing good agricultural infrastructure.

Land Management

Objective:

- To maximize profitable use of our land.
- To avoid illegal use of our valuable resource which is our land.
- Protect unused land in order to make it available for the development of the Master Plan.
- To regulate influx into our area.
- Regulation and enforcement of customary laws and land policy.

RE A LEBOGA
